# RICOH Design Software

## – Easy Mode – Select Garment Type and Thickness

- Easy Designer simplifies the execution of multiple tasks from editing design data to printing it. To perform these tasks, follow the procedures that appear by clicking the button on the lower right of the screen.
- We recommend using this mode when you edit a single photo and print it or if you use Design Software for the first time.

1. Easy Mode has (4) Garment Types available: T-shirt, Sweatshirt, Tote Bag, and Other
2. Each Garment Type has different thickness options, drop size varies based on the garments thickness chosen.

The screenshot shows the 'Select Garment' screen in the RICOH Design Software. At the top, a progress bar indicates six steps: 1 (selected), 2, 3, 4, 5, and 6. A 'Manual' button with a question mark icon is on the right. The main area is divided into two sections. The first section, 'Select Garment Type', is marked with a blue hexagon containing the number 1. It displays four garment options: T-shirt, Sweatshirt, Tote Bag, and Other. The T-shirt option is highlighted with a yellow border. The second section, 'Select Garment Thickness', is marked with a blue hexagon containing the number 2. It shows two radio button options: 'Thin' (unselected) and 'Normal' (selected, highlighted in yellow). At the bottom, there is a 'Previous' button on the left and a 'Select Tray' button on the right.

## RICOH Design Software – Easy Mode – Select Tray Size and Orientation

1. Easy Mode only supports A4 and A5 trays, socks and sleeve platen is only supported in the advanced mode.
2. A4 and A5 platens support Portrait and Landscape Orientation

The screenshot shows the 'Select Tray' screen in the RICOH Design Software Easy Mode. The interface is clean and user-friendly, with a top navigation bar containing a 'TOP' button, a sequence of numbered steps (1, 2, 3, 4, 5, 6) where step 2 is currently active, and a 'Manual' button with a question mark icon. The main content area is titled 'Please choose the size and orientation to print.' and is divided into two sections: '1 Size' and '2 Orientation'. In the 'Size' section, there are two radio button options: 'A4' (selected) and 'A5'. In the 'Orientation' section, there are two radio button options: 'Portrait' (selected) and 'Landscape'. To the right of these options is a visual representation of a white t-shirt with a yellow rectangular print area. At the bottom left, there is a 'Previous' button, and at the bottom right, there is a blue 'Prepare Garment' button.
